

TERMISOL 2.5% EC

ULTIMATE DEFENCE AGAINST TERMITES

TERMISOL is a termiticide containing the active ingredient **Fipronil 2.5% EC**, which belongs to a relatively new chemical group called **Phenyl Pyrazole**. It acts on insects by ingestion, transfer effect and by contact. Its unique mode of action inhibits the nerve impulse and distinguishes it from other available termiticides.

It ensures intensive and complete control against all types of termites and wood-boring insects.

Termite is a hidden pest and can cause havoc without any alarm. It is a social insect that lives deep in the soil and eats wood, panels and timbers. Termites are a threat across more than 70% of the world.

PRODUCT PROPERTIES

- ✓ Non-Repellent Formula
- ✓ Long Residual Effect
- ✓ 3-Way Action (ingestion, contact, transfer)
- ✓ Eliminates the Entire Colony

APPLICATION STAGES

- 1. Pre-Construction** — Foundation and flooring stage (written warranty up to 10 years).
